BLE

BLE – The Bluetooth button helps to connect the eZHI pad and eZHI app. Oneclick, Device & app will connect, another click Device & app will disconnect.

➢ First switch on the eZHI pad, verify pad blue color light is blinking.

➢ Switch on Android Phone Bluetooth & Location without fail

➢ Click BLE on App, the pad light should be stable and BLE button edge color should be Green if its successfully connected.

➢ If its not connected successfully, the BLE button edge will be red. So you should kill the app and do the same until its connected.

➢ Note: Check your Pad battery status and Android Phone battery status. Before connecting.
SYNC NOTES

SYNC NOTES – This option helps to download the stores notes on the phone memory.

❖ **HOW TO SAVE OFF LINE NOTES AND TO DOWNLOAD**

➢ You can save up to 150 pages of writings in the device itself without connecting to any other devices/ mobile.

❖ **Steps to save off line notes/writings**

➢ Ensure to power on the device and the blue LED flickers.
➢ Start writing and while writing you will notice that the blue LED flickers faster.
➢ Once the page /writing is over, then press the save button on the device
➢ You will see the written data is erased in the device and wait for few seconds
➢ When you see the blue LED flickers then you start writing
➢ Once you have finished the writings then switch off the device by pressing the power button

➢ Once you have connected the device to your mobile thru BLE and you will see the '**SYNC NOTES**' icon in the application; click the **'SYNC NOTES'** button and follow the instructions.

➢ Please ensure that when you are on sync mode the battery level is more than 50%. The downloaded offline notes will be in the file list under off line notes.
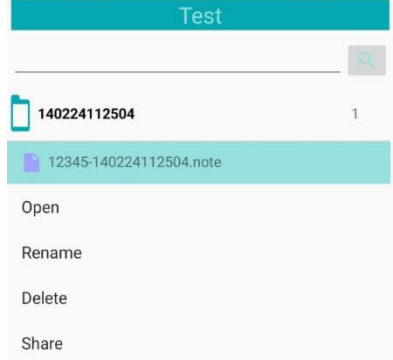

ONLINE LIST — The online notes consist of Folder & Files. Under the Folder, you can save files. when eZHI connected, the notes will be captured on connected mode and the data will be stored in Date & Time.
